

Components of Office 365 and Microsoft 365 Plans

	Advanced Threat Analytics	A platform that builds behaviour profiles of its users to protect against cyberattacks and insider threats		OneDrive for Business	Provides a Cloud space where you can store, share, and sync your files on any device
	Azure Active Directory	An Azure service that enables identity and access management, allowing hybrid users to access both on-premises and cloud servers seamlessly		Outlook	A professional email application that allows you to manage calendars, appointments, and contacts.
	Azure Information Protection	Allows labelling, classification and organisation of documents and emails		Power BI	A business analytics tool. Access data from many different apps and analyse it in new and complex ways
	Cloud App Security	Allows deeper visibility, stronger controls and enhanced protection for Cloud apps including discovery and investigation capabilities		Project	A project management tool assisting in developing a plan, managing budgets, and assigning tasks
	Delve	A discovery tool that allows you to connect and find your colleagues, giving you enhanced visibility of their activities		SharePoint	Allows you to seamlessly collaborate with your colleagues on documents stored in the Cloud
	Exchange Online	A Cloud based Email server. Outlook is the familiar application that allows you to access the content.		Skype for Business	An instant-messaging service with web conferencing, audio and video, allowing communication across multiple devices
	Flow	Allows you to create automated workflows between your favourite apps		Sway for Office 365	A tool that presents interactive reports, personal stories, music, tweets and newsletters
	Information Rights Management	Prevents confidential information from being saved, forwarded or printed by unauthorized personnel, helping to achieve compliance		Teams	A communication platform allowing a chat-centred workspace
	Intune	Allows unified endpoint management across all devices. You can control access to your data on multiple devices securely		Visio Pro	A professional flow chart and diagram software; makes advanced diagramming easy
	Mobile Device Management	Allows you to secure and manage your workforce's mobile devices: set policies and permissions and remotely wipe if a device is lost or stolen.		Windows 10	The latest Microsoft Operating System that manages the computer resources and provides functionality to your device
	Office	The software versions of the Office applications (Word, Excel, PowerPoint, Access etc.)		Windows Autopilot	Allows easy setup of new devices by deploying preconfigured settings
	Office 365 Advanced Threat Protection	Scans your email and removes malicious links and attachments, keeping your email safe		Windows Defender Advanced Threat Protection	Intelligence-driven solution providing total end to end security. Not to be confused with Office 365 Advanced Threat Protection.
	Office 365 Video	A secure, company-wide space for sharing and viewing video content across multiple devices		Yammer	A private social networking site allowing sharing and collaboration within your organisation
