		EM+S E3	EM+S E5
Identity and access management	Simplified access management and security Centrally manage single sign-on across devices, your datacentre, and the cloud	✓	✓
	Multi-factor authentication Strengthen sign-in authentication with verification options, including phone calls, text messages, or mobile app notifications, and use security monitoring to identify inconsistencies.	✓	✓
	Conditional access Define policies that provide contextual controls at the user, location, device, and app levels to allow, block, or challenge user access.	✓	✓
	Risk-based conditional access Protect apps and critical data in real time using machine learning and the Microsoft Intelligent Security Graph to block access when risk is detected.	✗	✓
	Advanced security reporting Monitor suspicious activity with reporting, auditing, and alerts, and mitigate potential security issues using focused recommendations.	✓	✓
	Privileged identity management Provide timely, on-demand administrative access to online services with access-related reporting and alerts.	✗	✓
	Windows Server Client Access License (CAL)* Provide each user access to server functions from multiple devices for a single fee.	✓	✓
Managed mobile productivity	Mobile device management Enroll corporate and personal devices to provision settings, enforce compliance, and protect your corporate data.	✓	✓
	Mobile application management Publish, configure, and update mobile apps on enrolled and unenrolled devices, and secure or remove app-associated corporate data.	✓	✓
	Advanced Microsoft Office 365 data protection Extend management and security capabilities across users, devices, apps, and data, while preserving a rich, productive end-user experience.	✓	✓
	Integrated PC management Centralise management of PCs, laptops, and mobile devices from a single administrative console, and produce detailed hardware and software configuration reporting.	✓	✓
	Integrated on-premises management Extend your on-premises management to the cloud from a single console with Microsoft System Center Configuration Manager and Microsoft System Center Endpoint Protection integration for enhanced PC, Mac, Unix/Linux server, and mobile device administration.	✓	✓
Information protection	Persistent data protection Encrypt sensitive data and define usage rights for persistent protection regardless of where data is stored or shared.	✓	✓
	Intelligent data classification and labeling Configure policies to automatically classify and label data based on sensitivity and then apply persistent protection.	✗	✓
	Document tracking and revocation Monitor activities on shared data and revoke access in case of unexpected events.	✓	✓
	Encryption key management per regulatory needs Choose default key management options or deploy and manage your own keys to comply with regulations.	✓	✓
Identity-driven security	Microsoft Advanced Threat Analytics Detect abnormal behavior in on-premises systems and identify advanced targeted attacks and insider threats before they cause damage.	✓	✓
	Microsoft Cloud App Security Gain visibility, control, and protection for your cloud-based apps, while identifying threats, abnormal usage, and other cloud security issues.	✗	✓
