

# Simple Secure Cloud- Managed Networks

## Mako - Network Management Made Easy

The Mako System is a non-stop networking and security solution that is simple to deploy and manage. Mako appliances are managed through a single cloud-based interface. Network configuration, control and reporting are available for one to thousands of locations.

As the only network management service provider with end-to-end Payment Card Industry Data Security Standard (PCI DSS) certification, Mako provides bank-grade security for your entire network.

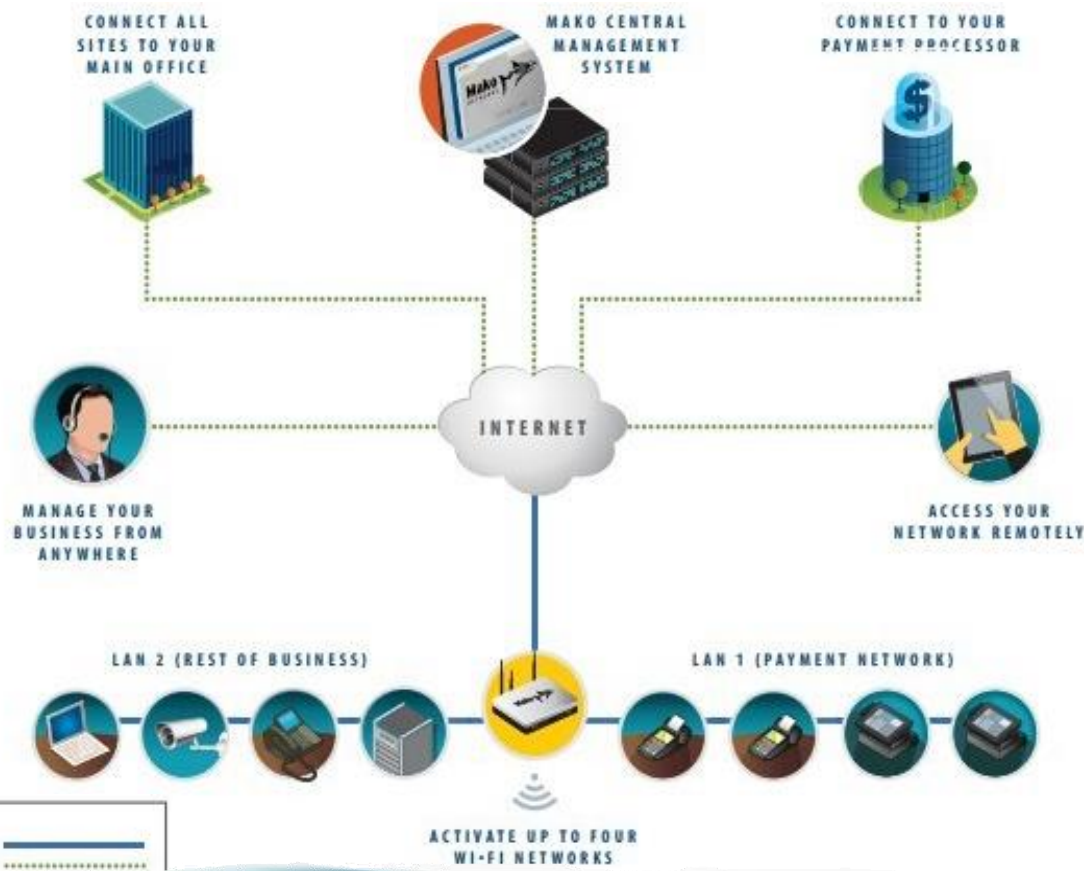

For an affordable price, Mako secures your broadband connection and manages your network with a single Mako appliance at each site. Optional integrated 4G/3G\* backup capability is available if connectivity is unavailable

 <p><b>CLOUD BASED MANAGEMENT</b> Get complete network configuration and visibility for your technical staff via Mako's Central Management System (CMS).</p>	 <p><b>CELLULAR FAILOVER</b> Keep the network up and running with a fast 4G/3G* backup connection if the primary broadband service goes down.</p>	 <p><b>VIRTUAL PRIVATE NETWORKS (VPNs)</b> Get complete network configuration and visibility for your technical staff via Mako's Central Management System (CMS).</p>
 <p><b>CONTENT FILTERING</b> Control Internet usage by blocking sites that may be either inappropriate or non business related.</p>	 <p><b>USAGE REPORTING</b> Get detailed reports on Internet usage at your site(s) to help you monitor how the Internet is being used.</p>	 <p><b>WI-FI</b> Activate up to four Wi-Fi networks for private or guest use at no extra charge.</p>
 <p><b>STATUS ALERTS</b> Receive real-time proactive email notifications of potential network concerns, threats and connectivity issues.</p>	 <p><b>AUTOMATIC SOFTWARE UPDATES</b> Receive automatic Mako software updates to reduce the stress of maintaining security of your network.</p>	 <p><b>PCI DSS</b> Achieve compliance more easily with Mako's end-to-end PCI DSS certified security.</p>

\* Subject to local availability. \*\* Your location will need an existing Internet connection in place to utilize the Mako System.

# Simple Secure Cloud- Managed PCI Managed Networks

## Network Management Made Easy

## Benefits

- All-in-one capability: Integrated solution that provides affordable and easy-to-manage PCI network security, 4G/3G\* backup, Wi-Fi, central management and 24x7 monitoring and alerting. Cost savings: Eliminate the cost and complexity of managing multiple solutions.
- Ease-of-use: Make configuration changes easily to a large network with cloud-based management.
- High availability: Maintain connectivity by automatically switching to an integrated 4G/3G\* backup connection if the primary broadband goes down.
- Scalability: Manage from one to thousands of locations seamlessly with cloud-based management.
- Security: Attain comprehensive security with Mako's ICSA certified security appliances and PCI DSS certified services.
- Easy VPN configuration: Create Mako-protected IPsec VPNs in three easy clicks (static IP addresses not required).
- Centralised management: Access automatic alerts, reporting and multi-level support for the entire network.
- Maximum performance: Control how your network is being used and block non-critical Internet traffic with advanced content filtering.
- Data sovereignty: Control the security of your data and eliminate any dependencies on third-party networks.
- PCI DSS compliance: Reduce the scope of compliance and simplify the reporting process with Mako's PCI DSS certification.
