

What we Migrate

SkyKick can move data from virtually any on-premises or hosted POP3/IMAP/Exchange email system.

Data/Settings	What we migrate				
	Exchange	POP3	IMAP	Google	SBS

Product Key	■	Outlook Assistant			
	■	Server Sync			
	■	Exchange Assistant			

Small Business Server versions 2003-2013. Exchange versions 2003-2013.

SkyKick does not utilize DirSync integration when performing the migration. If you require DirSync configured permanently for business reasons, we recommend you set it up prior to finalizing your SkyKick migration order. SkyKick supports migrations from Lotus Notes, GroupWise, or Zimbra on a case-by-case basis.
